Authorization for this examiner's amendment was given in a telephone interview with Mr. R. Burns Israelsen on 5/24/2005.

In the Abstract, line 2, delete "comprises", insert therein --includes--.

4. The following is an examiner's statement of reasons for allowance:

In combination with other limitations of the claims, the prior art does not teach a power management unit coupled to the loop, the power management unit having an output coupled to a storage capacitor for charging the storage capacitor, an input port for receiving excess power from the loop, a control terminal responsive to a control output from the controller for controlling the charging of the storage capacitor, and the transducer including an input for receiving energy from the storage capacitor under

control of the controller (claim 1); a power management unit coupled to the current loop, the power management unit having an output coupled to a storage capacitor for charging the storage capacitor, an input port for receiving excess current from the current loop, and a transducer including an input for receiving energy from the storage capacitor under the control of the controller (claim 7).

Claims 2-6, and 8-14 are allowed based on the dependency of the based claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
